School: _____

Date: _____

Guide Reference: Step 5: Develop the input for your strategy

Objective: Use the sustainability framework to develop the sustainability strategy.

This theme considers energy and carbon consumption across a site with the view to reduce the need for electrical energy from the grid, go fossil fuel free and reduce embodied carbon in materials used on-site.

The toolkit should be used in conjunction with the Sustainability Guide available on the [QIS BGA website](#). Refer to the Sustainability Guide for further instruction and commentary on how to use this tool to establish your school's sustainability strategy.

WORKSHEET ACTIVITY

What are your school's key energy and carbon considerations (costs, high consumption etc.)?

What energy and carbon efficiency initiatives have been done at your school before?

Have you completed an energy audit? If so, summarise key findings or review usage and note observations.

What are the major challenges for energy and carbon efficiency at your school?

What are the major opportunities for energy and carbon efficiency at your school?

Is there any funding available for energy and carbon efficiency initiatives?

Set 1 to 3 priorities for energy and carbon efficiency.
